

Company Name: Living Stones Interlocking Brick Inc.

Project Name: Berwick Retirement Parksville

Project Value: \$2,500,000.00

The Berwick Parksville Community was a full scope project for Living Stones and one of the biggest commercial projects they have been involved in. Over the course of two years their crews, estimators and project managers worked to create a high quality landscape that consisted of concrete retaining walls, flatwork, custom water features, landscaping, pond construction, bridge construction and installation, irrigation and the installation of paving stone patios and pathways. The end result was a sophisticated, west coast inspired landscape that will provide current and future residents with endless hours of enjoyment and serenity right in their backyard.
