

Company Name: Durwest Construction Management Inc.

Project Name: Victoria High School - Seismic Upgrade and Renovation

Project Value: \$54,000,000.00

The Victoria High School Project is an outstanding example of construction prowess, transforming a historic site into an educational beacon. This nomination highlights its seismic restoration, preservation of historical importance, and robust engagement with alumni and the community, despite facing significant structural challenges and labour shortages. With a budget surpassing \$10 million, the Victoria High School Project embarked on revitalizing a centennial architectural gem. However, it wasn't merely a renovation; it was a preservation effort, melding the essence of the past with contemporary needs. The project aimed to honor the school's heritage while preparing it for the future.
